

Indigenous Student Data

September 2023

Indigenous Student Data

Indigenous Completion rates (both 5 and 6 year) both saw a 7% reduction. At the same time, there was a 9% reduction in the number of Indigenous Learners who graduated with an Adult Dogwood.

There were sizable increases across all tracked academic courses in the percentage of Indigenous Learners who completed the courses with a C+ or better.

There was a dichotomy in Indigenous student data for this year--there was a decrease in the percentage of students who graduated; however, those who graduated showed marked increases in academic success.

The participation rate of Grade 10 Indigenous students who were in Foundations and Pre-Calculus Math 10, as opposed to Workplace Math 10, has markedly increased. More Indigenous students took Foundations and Pre-Calculus 10 and more completed with a C+ or better.
